PRODUCT REQUIREMENTS DOCUMENT

AI Practice Operating System (AI-POS)

Version 2.0 — April 2026

Prepared by

Sivaramakrishnan M.S., Senior Advocate

For review by Souvik (Engineering) and Flaura (UX Research)

1. Purpose of This Document

This Product Requirements Document (PRD) defines what the KPU Chambers AI Practice Operating System (AI-POS) must do, from the perspective of the people who will use it. Version 2 incorporates UI mockups for all key screens and adds user stories arising from the mockup design session.

This document covers three things: who uses the system (personas), what they need it to do (user stories with acceptance criteria), and what the key screens look like (UI mockups with design notes).

2. Product Vision

KPU Chambers AI-POS is the primary operating layer of a boutique commercial litigation and advisory practice. It manages the full lifecycle of every matter — from client intake to final invoice — ensuring that the right person has the right information at the right time, and that AI-generated outputs never reach a client without passing through a human hand.

Three non-negotiable principles govern every feature:

- The system acts on information. Humans act on people.
- Nothing leaves the chambers without passing through a human hand.
- Automation handles the mechanical and administrative. Judgment handles everything that carries the practice's name.

3. Personas

The system has three personas. Every user story is written from one of these perspectives.

Siva Founder & Senior Advocate	<i>"I need to be able to trust that nothing is falling through the cracks, without having to check everything myself."</i> Goals • See the complete state of the practice in one view every morning • Spend time on strategy, arguments, and client relationships — not administration • Ensure no invoice milestone is missed and no client communication goes out unchecked • Be immediately alerted to anything requiring his judgment — material deviations, arguments dates, escalations • Maintain full professional accountability for everything that leaves the chambers Current Frustrations • Non-litigation matters tracked only in email and memory • Invoice milestones identified manually and inconsistently
--	---

	• Preliminary strategy exists only orally until the engagement letter partially captures it • No Monday morning view of the full week across all matters
--	---

Gyana Associate	<i>"I want to know exactly what I need to do today and have the tools to do it well."</i> Goals • Start each day knowing what is due, pending, and coming up • Access full matter context in one place • Spend less time on mechanical tasks • Send professional client communications confidently • Never miss a hearing date or client follow-up deadline Current Frustrations • Matter information scattered across email, OneDrive, and ECourts • No structured record of the strategy behind a case • Client update emails require manual drafting even for routine adjournments • No system reminder when a client has not responded to a draft
---------------------------	---

The Client External — Receives Outputs Only	<i>"I want to know what is happening with my matter without having to call and ask."</i> Goals • Receive timely professional updates after every hearing • Receive clearly written documents for review and signature • Not have to chase for updates Current Frustrations • Receives updates only when a hearing occurs or chambers needs something • No visibility into matter status between touchpoints • Update quality and timing is inconsistent
--	--

4. Key Design Decisions

The following design decisions were made during the mockup session and govern the implementation of several user stories.

4.1 Role-Differentiated Case Status Screens

The case status screen is the same matter viewed through different lenses depending on who is logged in. Siva's view leads with strategic controls — Update Strategy Note, Generate Invoice — highlighted in amber to visually distinguish them. Gyana's view leads with the operational

case update panel. The strategic controls are entirely absent from Gyana's view, not merely disabled.

4.2 Strategy Note Storage — Dual Record Architecture

The live Strategy Note — the one the OS reasons against and anchors all downstream AI tasks to — is stored as a structured record in the matter record database (Azure SQL or Cosmos DB). This gives the OS fast structured access for AI operations. When Siva confirms the Strategy Note, the OS simultaneously pushes a clean PDF copy to the matter's OneDrive folder as the permanent archived record. The database record is the operational anchor. The OneDrive PDF is the human-readable archive.

4.3 OneDrive Document Access via Deep Link

All document buttons in the OS (View Docs, View Engagement Letter, View Filed Documents) open the relevant OneDrive folder or file via a deep link through the Microsoft Graph API. Documents never leave OneDrive and are never held inside the OS. Links are displayed as OneDrive with an external link indicator. If a document has not been uploaded to OneDrive, the button shows an Upload prompt.

4.4 Three-Path Case Update Flow

Recording what happened at a hearing operates via three paths, all of which produce identical outputs. Path A is automatic via middleware API (CaseMine or equivalent) for courts with same-day order sheet availability. Path B is manual upload of the order sheet PDF or image. Path C is manual text entry for courts where the order sheet is delayed. All three paths create a hearing log entry, update the next date, and generate a draft client update email. The manual paths are first-class features, not fallbacks.

4.5 Invoice Instruction Box

The invoice screen includes a free text instruction box — not a conversation window. Siva types specific instructions for this invoice: which stage, any disbursements to include, any special notes. This is a short bounded input, not a reasoning session. The system uses these instructions alongside the engagement letter to generate the invoice draft.

5. User Stories

User stories are organised by functional area. Priority levels: Must Have = required for launch. Should Have = important but not launch-blocking. Nice to Have = future addition.

5.1 MATTER INTAKE

US-01 create a new matter record by pasting or uploading a client's introduct

Persona: Siva Priority: **Must Have**

User Story

As Siva, I want to create a new matter record by pasting or uploading a client's introductory email or note, so that the system pre-populates the matter record with extracted information for my review.

Acceptance Criteria

- ✓ System extracts: client name, nature of dispute, opposing party if mentioned, relief sought, urgency indicators, suggested matter type
- ✓ All extracted fields are editable before confirming
- ✓ Matter record not created until Siva explicitly confirms
- ✓ Original client email attached to the matter record

US-02 assign a new matter to an associate and set a deadline for their prelim

Persona: Siva Priority: **Must Have**

User Story

As Siva, I want to assign a new matter to an associate and set a deadline for their preliminary strategy note, so that the associate knows from day one what is expected.

Acceptance Criteria

- ✓ Siva selects the associate and sets a deadline date
- ✓ Associate receives dashboard notification immediately on assignment showing the matter, client note, and deadline
- ✓ Matter appears on Siva's dashboard as Pending Internal Strategy Discussion

US-03 submit my preliminary strategy note through the system, so that Siva i

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want to submit my preliminary strategy note through the system, so that Siva is notified it is ready and we can hold our internal discussion with both inputs visible.

Acceptance Criteria

- ✓ Gyana writes or pastes her strategy note against the matter record
- ✓ On submission Siva receives a notification
- ✓ Both notes visible side by side when reviewing the matter

US-04 record the agreed preliminary strategy as a locked Strategy Note after

Persona: Siva Priority: **Must Have**

User Story

As Siva, I want to record the agreed preliminary strategy as a locked Strategy Note after our internal discussion, so that the strategy is captured in writing and serves as the anchor for all downstream work.

Acceptance Criteria

- ✓ Siva writes or dictates the agreed strategy into the matter record
- ✓ Once approved, the Strategy Note is locked and versioned — not editable without creating a new version
- ✓ All downstream AI tasks anchored to the latest approved Strategy Note
- ✓ Strategy Note stored as structured record in OS database AND pushed as PDF to OneDrive matter folder on confirmation
- ✓ Matter status updates to Strategy Finalised

5.2 ENGAGEMENT

US-05 record client go-ahead and generate a draft engagement letter, so that

Persona: Siva Priority: **Must Have**

User Story

As Siva, I want to record client go-ahead and generate a draft engagement letter, so that scope and fees are formally documented without drafting from scratch.

Acceptance Criteria

- ✓ Siva marks client go-ahead received
- ✓ System generates draft engagement letter using Strategy Note, matter type, and fee structure Siva specifies
- ✓ Draft editable before approving
- ✓ On approval, draft available to copy and send from Outlook
- ✓ Matter status updates to Awaiting Engagement Letter Signature

US-06 upload the signed engagement letter and trigger the document request,

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want to upload the signed engagement letter and trigger the document request, so that the matter moves forward without waiting for Siva.

Acceptance Criteria

- ✓ Gyana uploads signed engagement letter
- ✓ Matter status updates to Documents Pending
- ✓ System generates draft document request email for Gyana to review and copy-send
- ✓ First invoice milestone flagged on Siva's dashboard if applicable

5.3 DOCUMENT REVIEW

US-07 record client documents received and index them, so that documents are

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want to record client documents received and index them, so that documents are linked to the matter without being moved out of OneDrive.

Acceptance Criteria

- ✓ Gyana logs documents and adds index entry for each file
- ✓ Documents remain in OneDrive — system holds index and link
- ✓ Webhook detects new file in OneDrive matter folder and prompts Gyana to confirm index entry
- ✓ Matter status updates to Document Review

US-08 query specific facts from a client document against the Strategy Note

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want to query specific facts from a client document against the Strategy Note using the AI, so that I can check for discrepancies without bulk document ingestion.

Acceptance Criteria

- ✓ Gyana submits targeted query — specific fact vs Strategy Note
- ✓ System retrieves only relevant chunk from indexed document and compares to Strategy Note
- ✓ Discrepancy returned clearly flagged with source text from both documents
- ✓ Full document bundle never sent wholesale to the AI model

US-09 flag a material deviation and escalate to Siva, so that he is immediat

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want to flag a material deviation and escalate to Siva, so that he is immediately aware without me having to track him down.

Acceptance Criteria

- ✓ Gyana flags deviation with description
- ✓ Siva receives immediate notification
- ✓ Matter status: Strategy Review — Material Deviation
- ✓ All other triggers paused pending Siva's resolution
- ✓ Siva records one of three resolutions: proceed, fee revision, new strategy

5.4 RESEARCH AND DRAFTING

US-10 As Gyana, I want the system to prompt me for second-round legal research, so that I do not

Persona: Gyana Priority: **Must Have**

User Story

As Gyana, I want the system to prompt me for second-round legal research, so that I do not have to remember this step myself.

Acceptance Criteria

- ✓ When status moves to Research and Drafting, Gyana's dashboard shows task: conduct second-round research on SCC Online
- ✓ System provides Strategy Note and preliminary research scaffold as context
- ✓ Gyana conducts research manually and uploads note to matter record
- ✓ System does not conduct second-round research autonomously

US-11 As Gyana, I want the system to generate a first draft of the primary legal document, so th

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want the system to generate a first draft of the primary legal document, so that I have a strong starting point to refine.

Acceptance Criteria

- ✓ System generates draft using Strategy Note, research note, client documents, and matter type
- ✓ Draft anchored to Strategy Note — negative constraint prevents facts outside the Strategy Note
- ✓ Side-by-side review view: draft on right, Strategy Note on left
- ✓ Gyana edits, Siva approves before client sees it
- ✓ Follow-up reminder set if no client response after defined period

US-12 be reminded when a client has not responded to a draft, so that matter

Persona: Gyana **Priority:** **Should Have**

User Story

As Gyana, I want to be reminded when a client has not responded to a draft, so that matters do not go quiet.

Acceptance Criteria

- ✓ Overdue flag on Gyana's dashboard after follow-up period
- ✓ System generates draft follow-up email
- ✓ Reminder repeats until response recorded
- ✓ Siva also sees overdue client responses

5.5 LITIGATION — FILING AND HEARINGS

US-13 mark a matter as ready for filing and record the case number, so that

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want to mark a matter as ready for filing and record the case number, so that the matter record is updated and Siva is informed.

Acceptance Criteria

- ✓ Gyana marks ready for filing — Siva notified for awareness
- ✓ After filing Gyana records case number
- ✓ Matter status: Filed
- ✓ Stage 2 invoice milestone flagged on Siva's dashboard

US-14 As Gyana, I want hearing day reminders, so that I never miss a court date.

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want hearing day reminders, so that I never miss a court date.

Acceptance Criteria

- ✓ Dashboard notification each morning when hearing scheduled
- ✓ Shows: matter name, court, case number, current stage
- ✓ If arguments stage: Siva also receives the reminder

US-15 record what happened at a hearing via any of three paths and have the

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want to record what happened at a hearing via any of three paths and have the system generate a draft client update email, so that I spend thirty seconds confirming rather than five minutes drafting.

Acceptance Criteria

- ✓ Path A — Middleware API (CaseMine or equivalent): system detects hearing, pulls order sheet, generates draft email automatically
- ✓ Path B — Manual upload: Gyana uploads order sheet PDF/image, system extracts text and generates draft email
- ✓ Path C — Manual text entry: Gyana types what happened and next date, system generates draft email from entry
- ✓ All three paths produce identical quality outputs — manual paths are first-class features
- ✓ Draft email presented for Gyana's review — she copies and sends from Outlook
- ✓ Hearing log entry created and next date updated regardless of which path used

5.6 LITIGATION — ARGUMENTS

US-16 As Siva, I want matters listed for arguments to appear on my dashboard well in advance, so

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want matters listed for arguments to appear on my dashboard well in advance, so that I can begin citation research without checking ECourts separately.

Acceptance Criteria

- ✓ Matters with next hearing within 14 days at Arguments stage appear as priority items on Siva's dashboard
- ✓ Shows: matter name, court, case number, next hearing date, days remaining
- ✓ System prompts: begin Arguments Bundle preparation
- ✓ Prompt highlighted as urgent within 7 days if no bundle started

US-17 upload an Arguments Bundle as a paired List of Citations and Synopsis,

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want to upload an Arguments Bundle as a paired List of Citations and Synopsis, so that both documents are versioned together.

Acceptance Criteria

- ✓ Siva uploads Citations and Synopsis as a paired bundle
- ✓ System labels bundle Version 1, Version 2 etc. automatically
- ✓ Each version preserved — earlier versions not overwritten
- ✓ Revision reason logged: new point by court or new submission by opposing side
- ✓ System does not generate Arguments Bundle autonomously — Siva prepares manually on SCC Online

US-18 mark arguments concluded and finalise the filed versions, so that the m

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want to mark arguments concluded and finalise the filed versions, so that the matter record distinguishes working documents from filed documents.

Acceptance Criteria

- ✓ Arguments Concluded is a deliberate named action by Siva
- ✓ System prompts: prepare filed Synopsis and final Citations from last working bundle
- ✓ Siva uploads filed versions — labelled as Filed on matter record
- ✓ Stage 3 invoice milestone flagged
- ✓ Matter status: Awaiting Order

5.7 ORDER AND CLOSURE

US-19 be notified when a final order is received and prompted to advise the c

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want to be notified when a final order is received and prompted to advise the client, so that the matter does not sit in limbo.

Acceptance Criteria

- ✓ Final order recorded — Siva notified
- ✓ System generates draft client advice note for Siva's review
- ✓ Siva reviews, approves, copies, sends from Outlook
- ✓ On marking client advised: status Closed or Further Proceedings
- ✓ Final invoice milestone flagged

5.8 INVOICING

US-20 As Siva, I want invoice milestones on my dashboard when they are due, so that I never miss

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want invoice milestones on my dashboard when they are due, so that I never miss a billing opportunity without the system generating invoices on its own.

Acceptance Criteria

- ✓ Invoice milestones flagged on Siva's dashboard when triggering condition met
- ✓ Flag shows: matter name, stage, amount due
- ✓ No invoice generated until Siva explicitly initiates generation
- ✓ Invoice generation and dispatch are two separate deliberate actions

US-21 generate a draft invoice from the matter record with a single initiation

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want to generate a draft invoice from the matter record with a single initiation action, so that the invoice is accurate without manual assembly.

Acceptance Criteria

- ✓ On initiating, system pre-populates invoice using engagement letter, matter record, and prior invoices
- ✓ Siva adds any specific instructions in the free text instruction box — stage, disbursements, notes
- ✓ Invoice presented as draft — Siva edits before approving
- ✓ System also generates draft covering email
- ✓ On approval, invoice and email available to download — dispatch is manual from Outlook
- ✓ Sent invoice logged on matter record with date and amount

US-22 see outstanding invoices across all matters in one view, so that I can

Persona: Siva **Priority:** **Should Have**

User Story

As Siva, I want to see outstanding invoices across all matters in one view, so that I can identify unpaid invoices without checking each matter.

Acceptance Criteria

- ✓ Siva's dashboard has an Invoicing section showing all matters with outstanding invoices
- ✓ Each row shows: matter name, client, invoice number, amount due, days outstanding
- ✓ System generates draft payment reminder for invoices overdue beyond defined threshold

5.9 DASHBOARDS

US-23 As Siva, I want my dashboard to give me a complete picture of the week without navigating

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want my dashboard to give me a complete picture of the week without navigating through individual matter records, so that I can plan the week in five minutes.

Acceptance Criteria

- ✓ New matters added since last login with client note and associate assigned
- ✓ Matters where strategy discussion is pending
- ✓ All active matters with status, next date, assigned associate
- ✓ Action items owned by Siva this week
- ✓ Matters coming up for arguments within 14 days
- ✓ Invoice milestones due for initiation
- ✓ Draft invoices awaiting sign-off
- ✓ Outstanding invoices overdue beyond threshold

US-24 As Gyana, I want my dashboard to show exactly what I need to do this week, so that I can s

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want my dashboard to show exactly what I need to do this week, so that I can start work immediately.

Acceptance Criteria

- ✓ Hearings scheduled this week — court, date, case number, stage
- ✓ New matters assigned since last login with client note and Siva's strategy deadline — displayed as a highlighted card
- ✓ All action items owned by Gyana with deadlines
- ✓ Drafts approaching or past follow-up deadline
- ✓ Matters where client returned comments

- ✓ No matters outside Gyana's assignments visible

5.10 NON-LITIGATION SPECIFIC

US-25 As Siva, I want non-litigation matters to have visible action items and deadlines on both

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want non-litigation matters to have visible action items and deadlines on both dashboards, so that these matters cannot go quiet.

Acceptance Criteria

- ✓ Non-litigation matters show open action items with owner and deadline on both dashboards
- ✓ Matter flagged as Needs Attention if no action item and no delivery date set
- ✓ System prompts Siva to set delivery date if matter has had no activity for defined period

US-26 upload a legal research note for a non-litigation matter anchored to t

Persona: Gyana **Priority:** **Must Have**

User Story

As Gyana, I want to upload a legal research note for a non-litigation matter anchored to the Strategy Note, so that the final deliverable is grounded in both.

Acceptance Criteria

- ✓ Gyana uploads research note against non-litigation matter record
- ✓ Research note linked to Strategy Note and visible in drafting view
- ✓ System draws from both Strategy Note and research note when generating first draft
- ✓ Research note is internal — not visible to client

5.11 SYSTEM-WIDE REQUIREMENTS

US-27 As Siva, I want every AI-generated output locked from download until a Human Verified conf

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want every AI-generated output locked from download until a Human Verified confirmation is recorded, so that nothing generated can accidentally reach a client unreviewed.

Acceptance Criteria

- ✓ All AI-generated outputs created in Draft state
- ✓ Download and Copy buttons disabled in Draft state
- ✓ Human Verified toggle must be explicitly set before buttons enabled
- ✓ Siva can verify all outputs. Gyana can verify outputs within her assigned matters

- ✓ Verification action logged in audit trail with timestamp and user ID
- ✓ There is no Send button anywhere in the system

US-28 As Siva, I want a full audit log of every AI action on each matter, so that I can demonstr

Persona: Siva **Priority:** **Must Have**

User Story

As Siva, I want a full audit log of every AI action on each matter, so that I can demonstrate how any AI-assisted output was produced.

Acceptance Criteria

- ✓ Every AI invocation logged: skill called, inputs, model used, output, timestamp
- ✓ Every human action on AI output logged: who verified, when, what action taken
- ✓ Audit log accessible from matter record at any time
- ✓ Audit log cannot be edited or deleted

US-29 As a team member, I want the system accessible only via Microsoft single sign-on, so that

Persona: Siva **Priority:** **Must Have**

User Story

As a team member, I want the system accessible only via Microsoft single sign-on, so that client matter data is never accessible to unauthorised parties.

Acceptance Criteria

- ✓ Login via Microsoft Entra ID SSO only
- ✓ Siva has access to all matter records
- ✓ Associates have access only to matters assigned to them
- ✓ All data remains within India-based Azure infrastructure

6. UI Mockups

The following mockups represent the six key screens of the system. These are design references for UX and engineering — not final production designs. All screens share a consistent layout: persistent left sidebar for case navigation, top bar for context and role identification, and main content area.

Colour coding convention used across all screens: blue accents indicate Siva's view and primary actions. Teal/green accents indicate Gyana's view. Amber highlights indicate Siva-only restricted actions. Red badges indicate urgent or overdue items.

Screen 1 — Siva Home Dashboard

Design notes

- Two-panel layout: My Action Items (left) and Invoice Milestones Due (right) above the fold
- Delegated Matters — Chambers Overview below the fold gives Siva visibility of all cases including those he does not own
- Onboard New Client button in top right navigates to the New Case Dashboard
- Each case in the sidebar and each row in the overview links to the Case Status screen for that matter
- Badge colours encode urgency: red = urgent or unassigned, amber = pending or review needed, blue = informational, green = on track

Screen 2 — Gyana Home Dashboard

Design notes

- New matter assignment displayed as a prominent teal card at the top — cannot be missed on login
- New matter card shows the client note, who assigned it, and Siva's deadline for the preliminary strategy note
- Hearings this week displayed with date block showing day and month for quick scanning
- Action items on the right include the draft ready state — Gyana can act directly from the dashboard
- Gyana sees only cases assigned to her — no visibility into other associates' matters or Siva's personal action items

Screen 3 — Case Status: Siva's View

Design notes

- Strategic Controls section displayed in amber to visually separate Siva-only actions from operational actions
- Update Strategy Note and Generate Invoice are visible and accessible only to Siva — entirely absent from Gyana's view of the same matter
- Arguments Bundles panel is prominent in Siva's view because managing bundles is his primary operational task at arguments stage
- Documents panel links to OneDrive via deep link — shown as OneDrive with external link arrow indicator
- Hearings log shows what happened at each date with colour-coded badges for Adjourned, Partial, and Order

Screen 4 — Case Status: Gyana's View

Design notes

- Record Case Update panel leads Gyana's view — this is her primary daily action after hearings
- Three-tab interface for the case update flow: Auto API (Path A), Upload Order Sheet (Path B), Manual Entry (Path C)
- Path A shows the API status indicator and the fetched order sheet text — Gyana reviews then clicks Draft Client Update Email
- All three paths end with the same Draft Client Update Email button producing identical output
- Strategy Note is visible as read-only with a note directing Gyana to Siva for updates — Strategic Controls amber section is entirely absent
- Case Actions panel provides all operational buttons Gyana needs: View Docs, Upload Docs, Draft Legal Output, Draft Synopsis, Upload Cases

MATTER FACTS

CLIENT

Listed Indian company acquiring 100% equity in Australian infrastructure and surveying company

TRANSACTION VALUE

AUD 2.1 million

KEY ISSUES

FEMA/ODI compliance · Funding options · Refundable deposit remittance · RBI approval thresholds

SCOPE

Indian law advisory only. Australian law out of scope.

STRATEGY REASONING AND RESEARCH

Siva

Client wants to acquire 100% of an Australian company for AUD 2.1M. They are listed in India. What are the primary FEMA considerations?

Chamber OS

For a listed Indian company acquiring 100% equity overseas, the primary framework is ODI under FEMA 120. Key considerations: (1) the 400% net worth limit — need to verify; (2) RBI automatic route availability for this sector; (3) the refundable deposit creates a two-way remittance issue needing careful structuring.

Draft strategy note generated

The matter involves an outward ODI under FEMA 120 by a listed Indian entity. Primary approach: structure via automatic RBI route using free reserves, subject to 400% net worth verification. Refundable deposit to be structured with explicit repatriation language. Scope: FEMA compliance advisory, ODI filing support, and transaction structuring — Indian law only.

Continue the strategy discussion...

Send

Design notes

- Split pane design: Matter Facts pinned on the left as persistent context, Strategy Reasoning conversation on the right
- Matter Facts panel shows the structured facts extracted at intake — client, transaction value, key issues, scope — providing grounding throughout the discussion
- The conversation is a long-context reasoning session, not a simple prompt. Full conversation history is stored in the OS and re-injected on return to maintain continuity across sessions
- Draft Strategy Note emerges from the conversation as a formatted block within the AI response — not a separate step
- Edit SN allows refinement of the draft. Confirm SN locks it as the versioned Strategy Note, stores it in the database, and pushes a PDF to OneDrive
- After confirmation the Draft button label changes to Edit for subsequent revisions — each revision creates a new version

Design notes

- Siva Only pill in the top bar reinforces that this screen is inaccessible to associates
- Fee Stages table shows the full engagement structure with Paid and Due Now status — Siva can see at a glance which stage is being invoiced
- View Engagement Letter button opens the signed engagement letter in OneDrive for reference before generating
- Instruction Box is a free text input — not a conversation window. Siva types the stage, disbursements, and any special notes in a few lines
- Generate and Download Invoice is a single action — invoice is generated as a PDF for download only. Dispatch is always manual from Outlook
- Outstanding Invoices panel on the right gives Siva the full chambers billing picture alongside the current invoice action

7. Out of Scope for Version 1.0

- Automated email dispatch — all dispatch is manual from Outlook
- Teams meeting scheduling — VC links generated manually in Teams
- Client-facing portal — future phase
- SCC Online API integration — legal research remains manual
- Autonomous invoice generation — milestones flagged and drafts generated on Siva's initiation only
- Mobile application — Version 1.0 is a web application

8. Assumptions

- The KPU Chambers Microsoft 365 tenant is active for Entra ID SSO and OneDrive integration
- OneDrive matter folders follow a consistent naming convention allowing the system to associate files with the correct matter record
- ECourts order sheets for SC and Civil / Commercial Court matters are available in machine-readable text format. Scanned PDFs handled by Azure Document Intelligence OCR
- Associates will use the system as the primary tool for matter management
- Microsoft 365 tools — Teams, Outlook, OneDrive — continue alongside the POS
- CaseMine or equivalent middleware API coverage for Karnataka High Court and NCLT Bengaluru bench to be verified by engineering before integration commitment

9. Document Note

This PRD was developed across two stages. Version 1 was generated from a structured concept design session between the Founder and an AI design assistant. Version 2 incorporates UI mockups from a dedicated mockup design session and adds user stories and design decisions arising from that session. The document reflects the Founder's actual practice workflow throughout.

User stories are ready for engineering estimation. UI mockups are ready for UX refinement by Flaura. Acceptance criteria should be reviewed by Souvik for technical feasibility before the build begins.

Human Generated — AI Assisted

Sivaramakrishnan M.S., Senior Advocate | KPU Chambers, Bengaluru | April 2026
